

I would like to take this opportunity to express my deep concern if the FCC would pass any proposal which would in any way harm the effectiveness of Indiana's Telephone Privacy law. I signed up for the "No Call List" in Indiana because I was tired of having my evenings at home with my family disturbed by telemarketers for companies I had no interest in dealing with. If I wish to purchase a product or additional benefits I would much rather do the research myself. Since I have been on the "No Call List" those nuisance calls have ceased. I greatly appreciate what Indiana's Telephone Privacy law has done for my family's peace of mind.
